## SOSKOLNE ASSOCIATES

Soskolne Associates (SA) was established in 1995 by Ronald Soskolne. Capitalizing on Ron's remarkable career that include a background in architecture, Chief Planner for the Central Core and Waterfront for City of Toronto, and Vice President positions for the planning and development arms for two of Canada's most notable large-scale international developers - Olympia and York and Reichmann International, SA provides real estate consulting services that specialize in large-scale mixed-use developments and public/private projects.

SA often works with clients who require, on a short-term basis, a high level of development expertise for the execution of specific projects. Such clients are usually municipalities, developers, private corporations or not-for-profit corporations. They have included entities such as The Walt Disney Company, Shell International, Canary Wharf Limited, and the City of Detroit. In addition, SA was also involved with in New York City with the Master Planning along the Brooklyn waterfront and developing a reuse strategy for the release and repositioning of 6 million sq ft of existing industrial building space.
