Halifax Regional Municipality Council

Re: Nova Scotia International Air Show

Dear Mayor and Councilors

In September of 2008 The Nova Scotia International Air Show will once again stage a world class air display in HRM. After taking 2007 off due to construction at the Halifax Stanfield International Airport, NSIAS will be bringing up to a dozen exciting performers to the City to entertain and educate the public; and to provide an excellent venue for the display and appreciation of Canada's military.

In preparation for the arrivals, practices, performances, media flights and departures; the Show requests Council's permission to over fly the City for the dates of September 3 to 8 inclusive. All flights will be at 1000' of altitude or greater in accordance with military and civil air regulations. The request in for performers in general and specifically for the Canadian Forces Snowbirds Demonstration Team who will be performing for the 25th time in the HRM and are essential to the continued success of our event.

We continue to be most appreciative of the continued support of the leadership and populace of the Region and look forward to staging another successful Air Show in the City.

Best regards

Colin Stephenson
Executive Director
Nova Scotia International Air Show
