Date of Council Meeting: August 6, 2013

Subject: Permit Regulations

Motion for Council to Consider: That Regional Council request a staff report respecting permit regulations as it relates to the transport and dumping of fill in residential areas.

Reason: As areas of HRM are being further developed in and around existing residential areas, residential roads/areas are subject to increased heavy truck traffic causing disruption and endangering the safety of those individuals. To consider the development of criteria relating to restrictions of the transport and dumping of fill in residential areas and the routing of said trucks.

Outcome sought: Staff report respecting permit regulations as it relates to the transport and dumping of fill in residential areas.

Councillor Lorelei Nicoll
District 4
