I've here back from the Province and the good news is that the traffic signal is warranted and will be installed next year. We are in the process of negotiating cost sharing, ownership and the operation and maintenance of the signal but that will not affect the timing. We will give you more specific details about the tendering, etc as we proceed. I'm sure this will be sufficient for CC as I'm sure you are the one most interested in this issue. If you have any questions, just give me a call.

thanks,
Ken
