

Atlantic Wood WORKS! program overview provided by Geoff Schimmel of Maritime Lumber Bureau

Atlantic Wood WORKS! is a regional program of the Maritime Lumber Bureau, as part of the national industry-led initiative of the Canadian Wood Council, with a goal to support innovation and provide leadership on the use of wood and wood products.

Through workshops, seminars and case studies, Wood WORKS! provides education, training and technical expertise to building and design professionals involved with commercial, institutional and industrial construction projects.

Atlantic Wood WORKS! provides practical, efficient, versatile and cost-effective building and design solutions through the use of wood -- the most sustainable, natural and renewable building material on earth.

You will be familiarized with Atlantic Wood WORKS! and the Canadian Wood Council, who we are and what we do. Sustainable building practices, green building, forest certifications and various forest facts will be presented. Types of engineered wood products, various species, applications, product availability, manufacturing processes and species used in manufacturing-identification will also be discussed.
