Halifax Regional Municipality Council

Re: Nova Scotia International Air Show

Dear Mayor and Councilors

In September of 2010 The Nova Scotia International Air Show will once again stage a world class air display in HRM. Between resurfacing of runways and hurricanes, there has not been a major air display in HRM since 2006. In this Centennial year of Canada's Navy, NSIAS will come back to its first home 12 Wing Shearwater, and once again entertain and educate the public.

In preparation for the arrivals, practices, performances, media flights and departures; the Show requests Council's permission to over fly the City for the dates of September 8 to 13 inclusive. All flights will be at 1000' of altitude or greater in accordance with military and civil air regulations. The request is for performers in general and specifically for the Canadian Forces Snowbirds Demonstration Team who will be performing for the 27<sup>th</sup> time in the HRM and are essential to the continued success of our event.

We continue to be most appreciative of the continued support of the leadership and populace of the Region and look forward to staging another successful Air Show in the City.

Best regards

Colin Stephenson  
Executive Director  
Nova Scotia International Air Show
